ENERGY AND WATER DEVELOPMENT AND RELATED AGENCIES APPROPRIATIONS ACT, 2013

SPEECH OF

**HON. ROBERT E. ANDREWS**

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, May 31, 2012*

The House in Committee of the Whole House on the state of the Union had under consideration the bill (H.R. 5325) making appropriations for energy and water development and related agencies for the fiscal year ending September 30, 2013, and for other purposes:

Mr. ANDREWS. Mr. Chair, I stand today in opposition to this legislation because it provides funding for the fundamentally flawed and wasteful Delaware Deepening project. Prior to the Army Corps' recent decision to partially fund this \$300 million project, it had previously only been funded through Congressional earmarks for the previous 6 years.

In June of 2002 the General Accounting Office (report # GA0-02-604) found that the Army Corps grossly misrepresented the costs and benefits of the project. The GAO determined that the economic analysis provided for the project contained a number of "material errors," "miscalculations, invalid assumptions, and the use of significantly outdated information." Based on the GAO's findings, the benefit to cost ratio of the project is closer to 0.49 to 1 as opposed to the 1.4 to 1 originally asserted by the Army Corps. A re-analysis completed by the GAO in 2010 (report # GA0-10-420) came to the same conclusion that the Delaware River Main Channel Deepening would not provide a good return on investment for the taxpayers. The latest re-analysis completed by the Army Corps last year fails to re-examine the costs. It also makes highly questionable projections about future benefits based on limited historical data.

The OMB, at President Obama's direction, has said the federal government should only provide funding for projects that are a demonstrated benefit for the nation; i.e. projects that have a benefit cost ratio of at least 2.5 to 1. As noted by the Corps of Engineers, the Delaware River Deepening is the only navigation project nationwide that had a benefit cost ratio less than the 2.5 minimum criteria. Previous Presidents, both Democrat and Republican, have not supported this project because it makes no economic sense.

Mr. Chair, there also continues to be an overwhelming number of serious environmental concerns raised by state and federal environmental protection agencies and experts about the project's impact on drinking water, commercial and recreational fish, shellfish, wetlands, wildlife, water quality—not to mention the hundreds of millions of dollars of economic revenue and jobs these natural resources support. This project is an economic loser and Congress should not be in the business of funding old earmarks.

PAYCHECK FAIRNESS ACT

**HON. EDDIE BERNICE JOHNSON**

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, June 5, 2012*

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Speaker, with the Senate expected to consider the Paycheck Fairness Act today, it is imperative that the House get serious about addressing pay inequality for working women across the United States. The House version of the Paycheck Fairness Act, H.R. 1519, seeks to achieve this pay equality and fairness by holding employers accountable for sex-based pay discrimination.

On average, women earn only seventy-seven cents for every dollar earned by their male counterparts, and that disparity can fluctuate even further across professions. For African American and Latina women, they are paid only 62 and 54 cents respectively for every dollar paid to their male counterparts. For countless families and single mothers trying to make ends meet, this wage disparity threatens their financial stability, and negatively impacts the livelihood of these women and their dependents.

The Paycheck Fairness Act is a common-sense piece of legislation that will ensure equal pay for all hardworking Americans. There is no basis for which pay discrimination should ever exist, and allowing this to continue undermines our Nation's economic recovery and our commitment to equality.

Mr. Speaker, fairness and equality are basic fundamentals that we must promote as a democratic Nation. Allowing pay discrimination on the basis of sex is not consistent with those principles, and I urge this Congress to take action against it. The Paycheck Fairness Act will provide a solid foundation on which we can build to promote fairness and equality in the workplace. As an original cosponsor of this important piece of legislation, I will continue to advocate for the rights of women all across the country.

ENERGY AND WATER DEVELOPMENT  
AND RELATED AGENCIES  
APPROPRIATIONS ACT, 2013

SPEECH OF

**HON. RUSS CARNAHAN**

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Friday, June 1, 2012*

The House in Committee of the Whole House on the state of the Union had under consideration the bill (H.R. 5325) making appropriations for energy and water development and related agencies for the fiscal year ending September 30, 2013, and for other purposes:

Mr. CARNAHAN. Mr. Chair, I rise in support of the Moran Amendment.

The streams, lakes, and wetlands of America are in desperate need of protection. These areas provide citizens with clean drinking water, are essential to sports and recreation, and, importantly to my district in St. Louis, protect cities from floods. The Army Corps of Engineers, and the Environmental Protection Agency developed a guidance plan this past summer to clarify the jurisdiction of the Clean Water Act, the paramount piece of legislation protecting these important areas. This guidance will confirm the water protections we depend on to keep our water safe. Thus, I sup-

port the Moran Amendment which would eliminate Section 110. Section 110 prevents the Corps from doing a critical part of its job: maintaining our country's significant water resources.

The Corps has already proposed guidance that would significantly clarify the Clean Water Act and ensure the safety of American waterways. Without these clarifications, 20 million acres of wetlands will continue to be left without legal protections. The American public depends on this Act for clean drinking water, protection from flood waters, and maintaining the habitats of important wildlife. The American public depends on us to support the Corps and place safeguards to keep our water clean. I urge my colleagues to vote in support of the Moran Amendment and not prevent the Army Corp of Engineers from doing their job. We must allow the Army Corps of Engineers to clarify the scope of the Clean Water Act, so that Americans can trust their waterways are clean.
